GLOBAL CONTEXT

Global Freight Rates

46%

higher than they were before the war started.

58.3%

of the oil imports for Mauritius is transported through the Hormuz Region.
UNCTAD

Some Asian Importers like China, Japan & South Korea have begun sourcing crude from as far as Argentina to offset lost Middle East supply, signaling the 'new normal', not quick, disruption.

An estimated **\$330 Billion** to global oil, fuel & LNG import bills from March to August due to the war, with crude driving nearly half that increase.

Smaller firms risk **exclusion from value chains, even when trade recovers.**

Escalating conflict between Yemen's Houthis & Saudi Arabia has **disrupted key oil routes** and pushed **global energy prices up** again.

Attacks on Saudi Arabia's East-West pipeline have reduced its capacity to about **8.6 million barrels per day** by the end of August.

WORLD FOOD PRICES

Up by

7%

since January 2026.

MEAT
+2%

SUGAR
+18%

CEREALS
+8%

OILS
+17%

DAIRY
-1%

Since the start of September, the **Mauritian Rupee** remained **stable** against the Euro & Pound Sterling, but depreciated against the USD (**1.1%**). However, the Mauritian Rupee has **lost in value** against the USD (**5.1%**) & GBP (**2.0%**) and Euro (**1.1%**).

Palm Oil prices rise
Strong global demand & El-Nino weather concerns are pushing palm oil prices higher.

Rise in International prices of Sugar
El-Nino affects production in key Asian countries. India's duty-free raw sugar imports add further upward pressure.

Energy prices are projected to surge by **24%** this year to their highest level.

Up to **363 million** people could face acute **food insecurity** this year.
(WORLD FOOD PROGRAMME)

More people at risk in Asia
The WFP forecasts a 24% increase in food-insecure people across Asia if the crisis persists.

Longer, costlier routes
Ships must bypass blocked routes, adding weeks of transit and roughly \$1 Million in extra fuel costs per ship.

Global Perspective

Global Freight

As at date, the global freight¹ rates are currently 46% higher than they were before the war started. As compared to last week, the freight has decreased by 4%

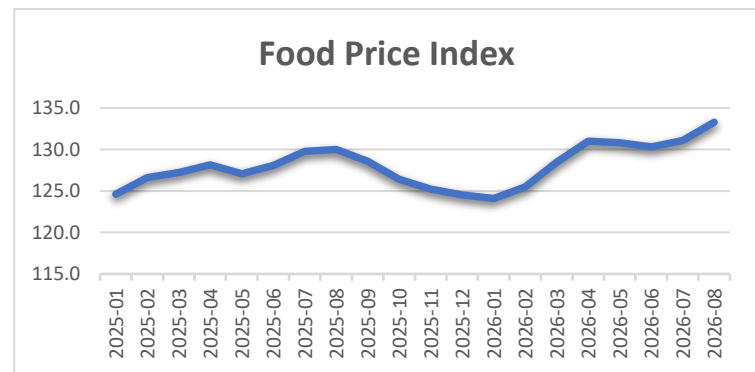

The war has led to main impact:

- 58.3% of the oil imports for Mauritius is sourced from the Hormuz region (UNCTAD)
- Some Asian importers — China, Japan, South Korea — have begun sourcing crude from as far as Argentina to offset lost Middle East supply, signalling the “new normal”, not quick, disruption.
- The war has added an estimated \$330 billion to global oil, fuel, and LNG import bills from March to August, with crude driving nearly half that increase.
- Smaller firms can remain at risk of exclusion from value chains even when overall trade volumes recover. Thus, creating the risk of an “exclusion effect”.
- Global energy prices spiked alarmingly again, driven largely by the escalating conflict between Yemen's Houthis and Saudi Arabia leading to damage in the East-West pipeline which is set to reduce to about 8.6 million barrels per day by the end of August.
- 2026 oil shock may become **larger than the 1973 and 1979 oil crises** and larger than the **2022 Ukraine-related energy crisis**

World Food Prices

Since January 2026, the world prices of food have been on upward trend and increased by 7%

The international prices of Meat (+2%), Cereals (+8%), Sugar (+18%) and Oils (+17%). The international prices of dairy fell by 1%.

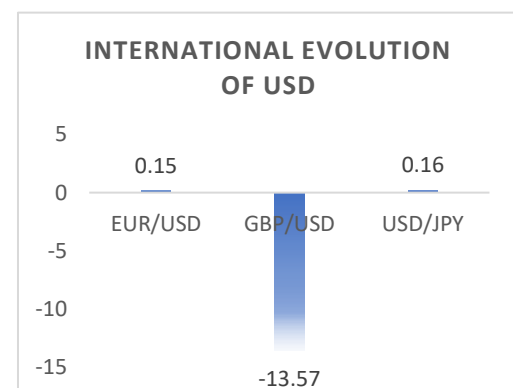

The Impact can be summarised by:

- International palm oil prices continued to increase, driven by robust global import demand.
- Super El Niño-related weather conditions continued to affect production prospects in key sugar producing countries in Asia. Additionally, India's announcement of duty-free raw sugar imports further contributed to the increase in international sugar prices.
- Energy prices are projected to surge by 24% this year to their highest level
- up to 363 million people can move into acute food insecurity this year, according to the WFP.
- The WFP forecasts a 24 percent increase in food-insecure people across Asia if the crisis persists
- Cargo ships must bypass blocked routes and sail entirely around the African continent. This adds weeks of transit and roughly \$1 million in extra fuel costs per ship.

International Prices of US Dollar

For the month of August, since the start of the war, the international prices of USD have **gain in value** against the GBP (13.57%) but **lose in value** against Euro (0.15) and JPY (0.16%).

Since start of September, the Mauritian Rupee remained **stable** against the Euro and Pound Sterling but **depreciated** against USD (1.1%). However, since start of January 2026, the rupee has **lost in value** against the USD (5.1%), GBP (2.0%) and Euro (1.1%).

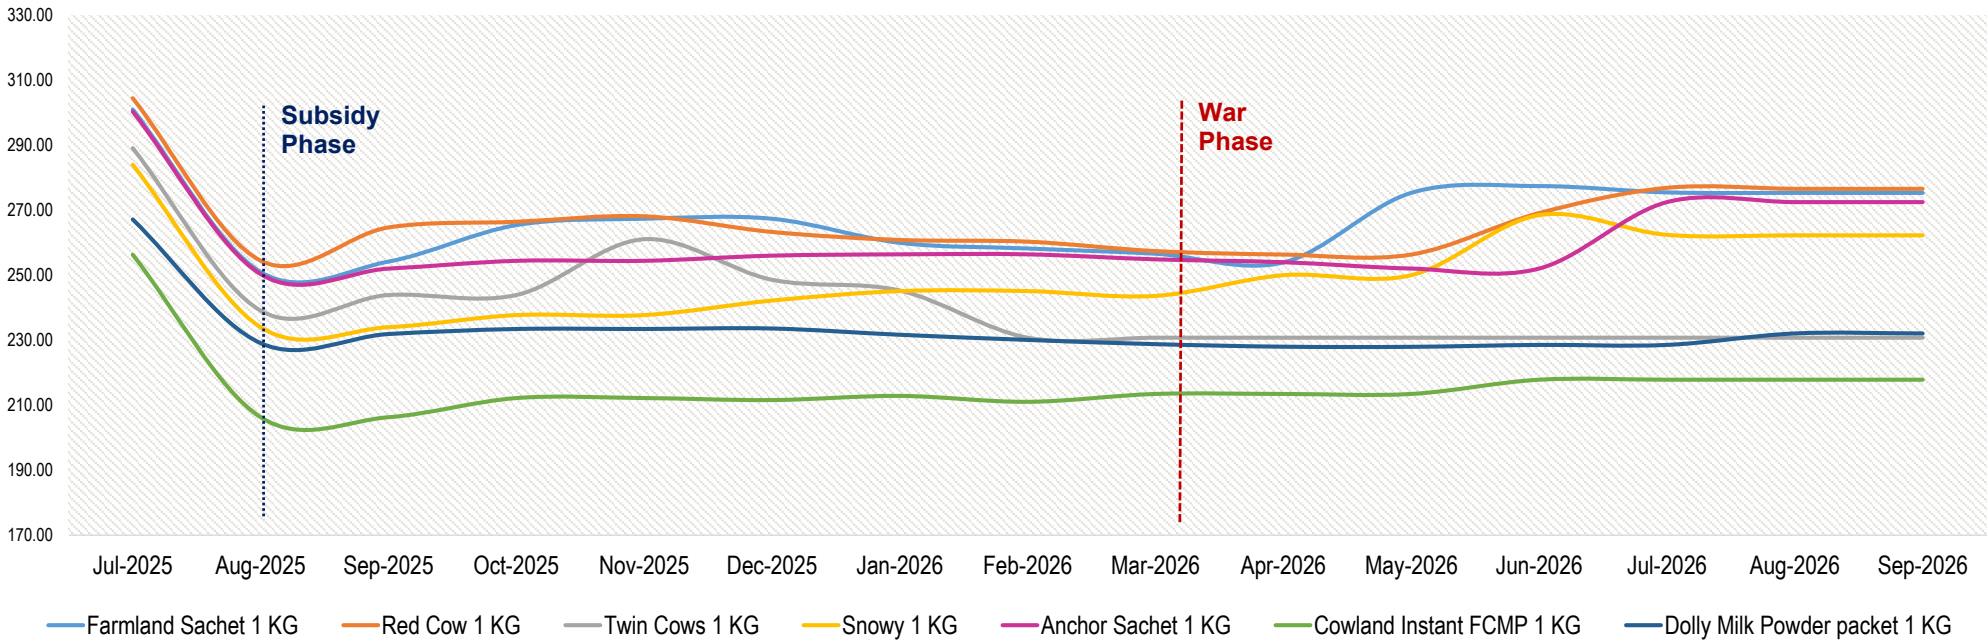

¹ Price of global freight USD 2,786 full container load in January 2026
